**Facilitator:** Pat Hughes, Trillium Leadership Consulting

### **Decisions:**

1. Approve Peds on Roadway White Paper, with amendments on “pedestrian” language
2. ATSC 2020 Summary with amendments:
  - a. Remove communications plan, add recommendations on p 7 of that draft plan
  - b. Same notes on usage about “pedestrians” apply to this document – preferred language is people who walk, people who bicycle, or people who walk and/or roll
  - c. Under the constraints section - merge the last two bullets to emphasize that ATSC is a newly formed group
  - d. Add a bullet re: COVID-19 impacts on how the group meets virtually.
  - e. Post the documents and then place links to them into the report-out section to reduce the document to 8-10 pgs.
  - f. Send out for final ATSC review before sending to Gov's office

### **Discussions and Actions**

- 1) The group reviewed the Working Agreements generated in September 2019, broke into smaller discussion groups, and made recommendations for changes and additions.
- 2) The group reviewed the Safety Definition levels and broke into small groups to discuss levels and offer examples that illustrate them. A suggestion was made (with much agreement) that we consider a different word than “levels”, such as factors or elements, and to identify what the four categories are about. A request was made to send similar frameworks to Scott, who will share with the Safety Definition Action Team.

3) Acknowledgement of Achievements this year – three questions were asked using platform that creates Wordle and WordCloud displays
