

# High Risk Driver Behavior—Flett Middle School

### **Driver Behavior**

During Active School Zone Times (100 Drivers)

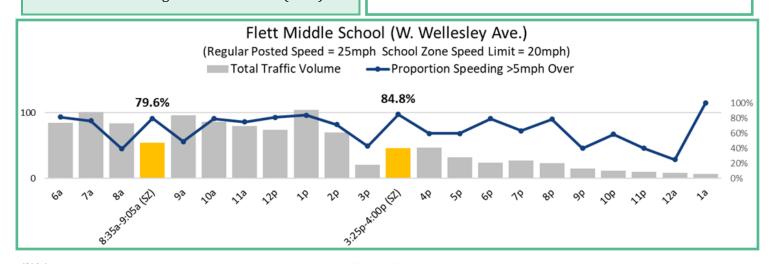

- $\Rightarrow$  Median speed = 30 mph
  - \*A.M. School Zone = 30 mph
  - \*P.M. School Zone = 30 mph
- ⇒ Maximum Speed Recorded = 43 mph
  - \*A.M. School Zone = 37 mph
  - \*P.M. School Zone = 43 mph
- ⇒ Distracted Drivers = 18 (18%)
- ⇒ Front Seat Passengers Unbelted = 4 (4%)

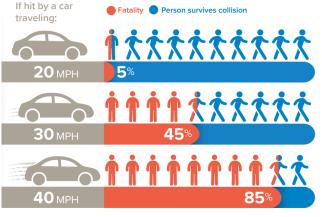

**During Regular Posted Speed Times (1,006 Drivers)** 

- ⇒ Median speed = 32 mph
- ⇒ Maximum Speed Recorded = 49 mph
- $\Rightarrow$  Distracted Drivers = 84 (11%)
- ⇒ Front Seat Passengers Unbelted = 92 (12%)

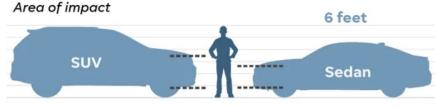

Driver behavior data was collected on W. Wellesley Ave. near the front of the school. This site has "20 mph when children are present" signage indicating the active school zone presumed to be 8:35—9:05 a.m. and 3:25—4:00 p.m. for report purposes. The regular posted speed is 25 mph. Speeding behavior was high at this location with most drivers traveling at least 5 mph over the speed limit at all times including in the active school zone. Nearly one in five drivers were driving distracted in the active school zone which was higher than non-school zone times (one in ten drivers).

### Size does matter

SUV front ends are taller, so they strike pedestrians higher on their bodies. That means they are more likely to kill a pedestrian than a car that would strike a person's leg.

### Driver Behavior in School Zones—Flett Middle School

Traffic sensors collected speed data from 6:00 a.m. until 1 a.m. (20 hours). In addition to speed, vehicle type, driver distraction, and front seat occupant seat belt use were collected from 7:00 a.m. until 5:00 p.m. (10 hours).

Nearly all drivers were exceeding the 25 mph posted speed limit and the 20 mph active school zone limit, with an alarming one-quarter of speeding drivers traveling greater than 35 mph at this location. There was no difference in speeding behavior among drivers of different vehicle types nor between daytime and nighttime hours.

# THE FATAL FOUR THE FATAL FOUR

## Active School Zone Non-School Zone

Three of every four drivers engaged in at least one high risk driver behavior, the most common being speeding greater than 5 mph over the speed limit. High risk driver behavior increased slightly during the active school zone. One in five high risk behavior drivers were engaged in two or more high risk behaviors at the same time (one in four in the active school zone). Four drivers were recorded as speeding, distracted, and unbelted all at the same time.
